PRODUCER OF PROFESSIONAL Refrigeration Equipment

20/16

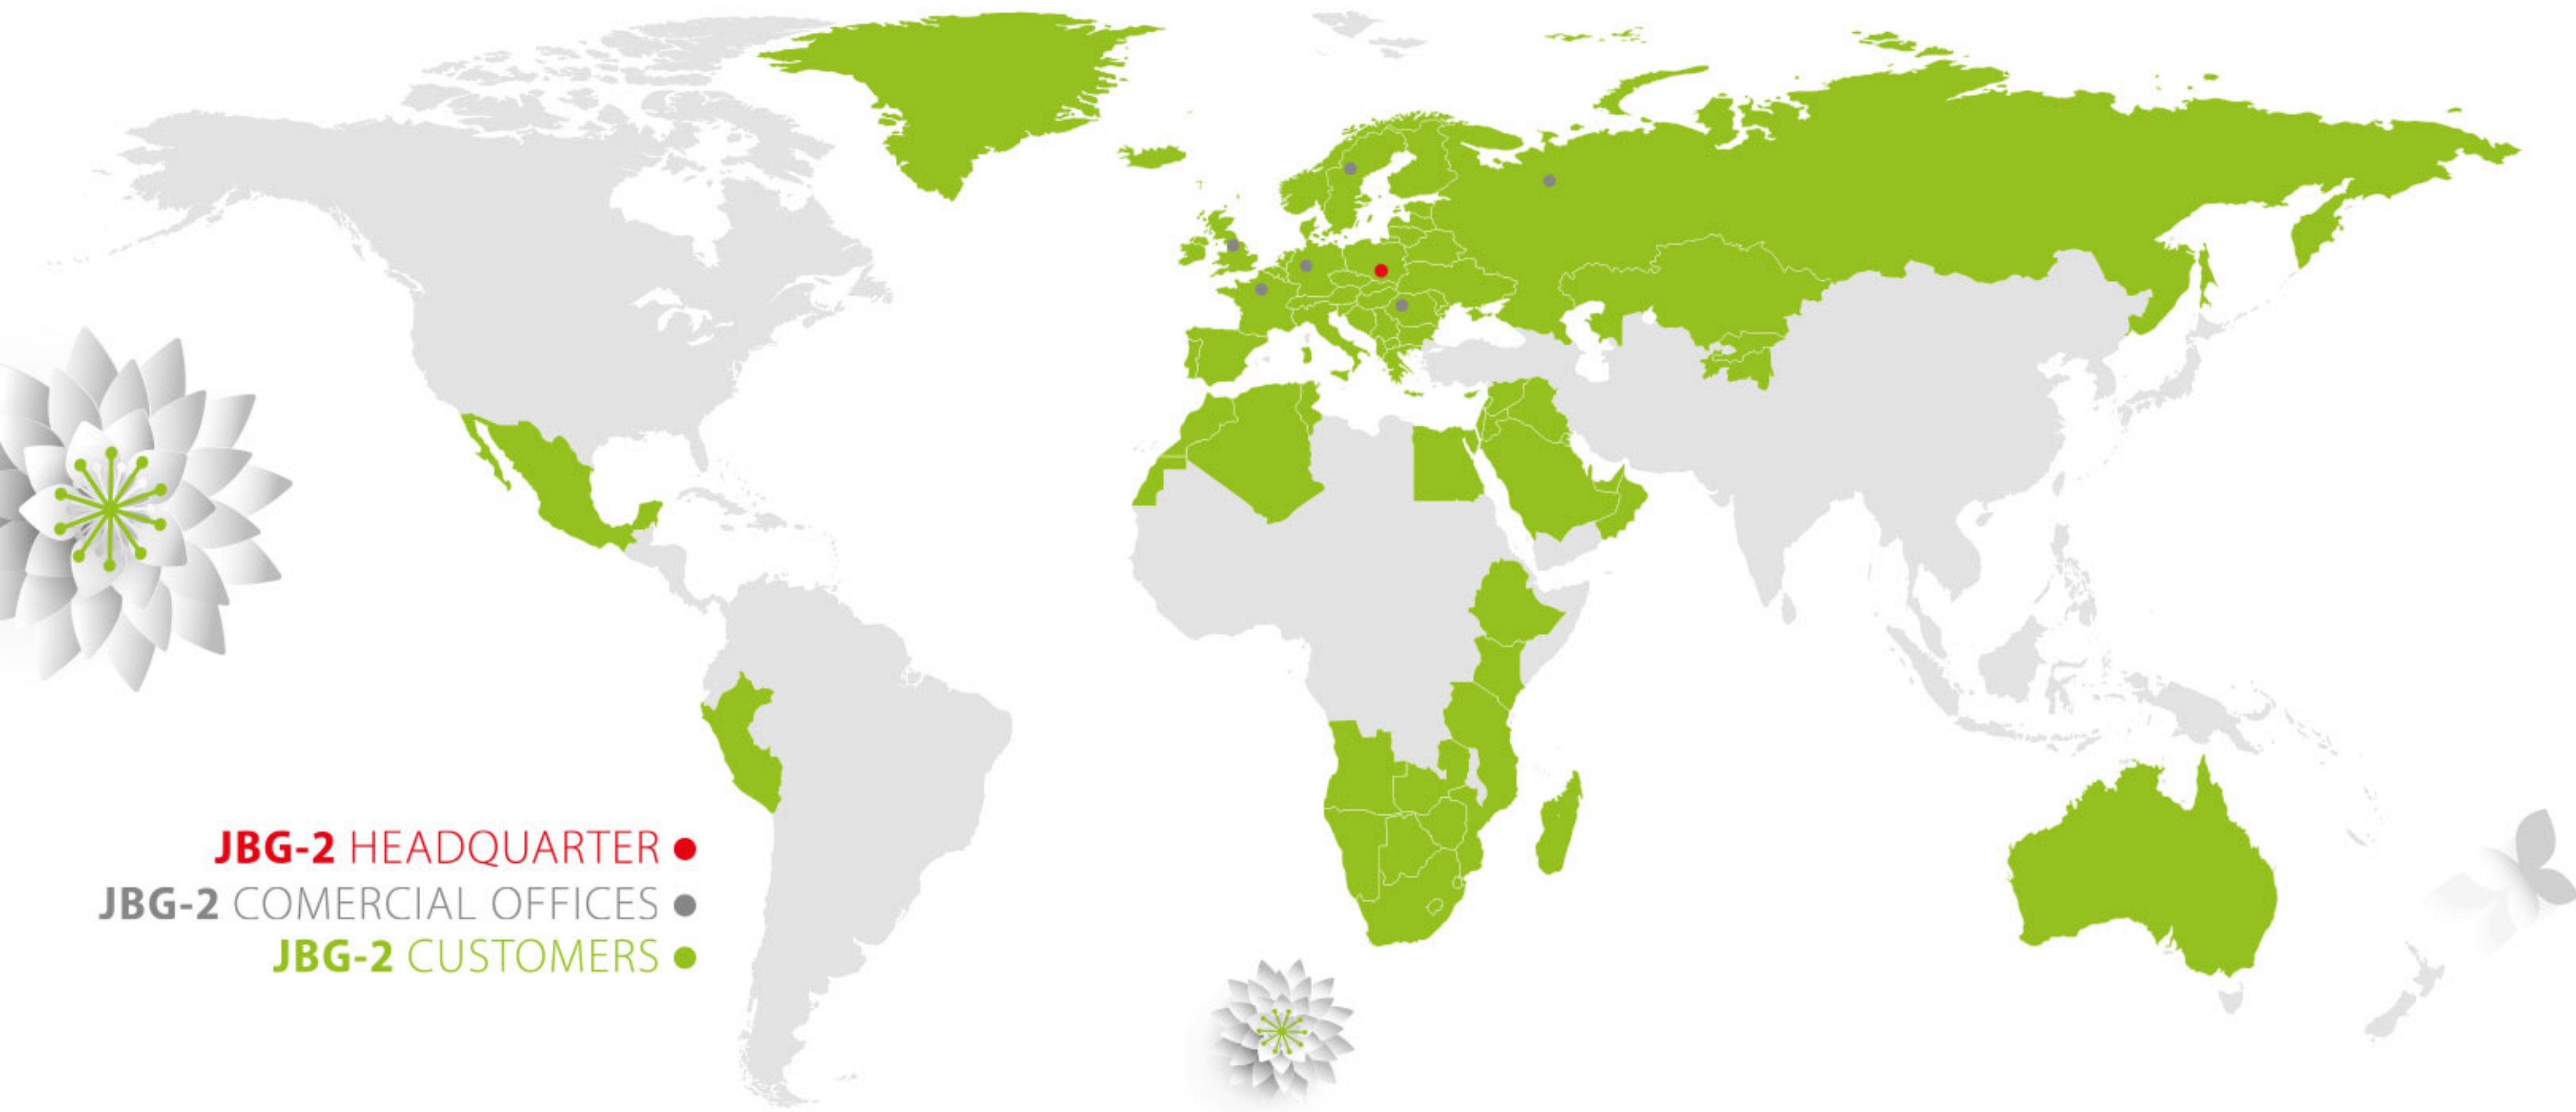

JBG-2 is a dynamically developing producer of refrigeration appliances for shops and supermarket chains. The history of the mark JBG dates back to 1989. The strategy chosen, as well as efficient management combined with passion for creation, fortitude and commitment of our personnel allow us to pursue our goal, i.e. development of a strong enterprise offering modern, energy efficient and ecological solutions to satisfy the needs of the refrigeration equipment market. By way of combining the latest technologies used for our production with high quality of customer service, we gained a broad circle of satisfied partners, including: Auchan Group, Metro Group, Tesco, Delhaize, Spar, as well as many other local commercial chains in Europe, Africa and the Middle East.

The registered office of the company along with the production hall are located on the area of the Special Economic Zone of Katowice, in Warszowice, at the national road No. 81, which forms perfect conditions in terms of logistics. The company has four test laboratories to examine the requirements of the standard ISO23953-2, equipped with modern control and monitoring systems. Quality management is effected directly basing on the standard ISO 9001-2009.

We would like to thank all our Clients for placing their trust in us. We also would like to encourage new Clients to experience cooperation with JBG-2 and to join the circle of our satisfied regular Clients.

With best regards JBG-2 Team
